

Health and Hygiene Monitoring Solution

Your Vital Partner
in Workplace Safety

Your Vital Partner in Workplace Safety

New CDC protocols require a higher standard of hand hygiene and social distancing adherence that are vital in combating the spread of COVID-19 to both workforce and business patrons.

Automate the monitoring and collection of hygiene and proximity data so your staff can get back to providing a confident and safe guest experience.

Relax in Confidence

Keep your workforce safe.
Ensure hygiene confidence.

Hourly Activity

How Does it Work?

Vitalacy smartbands monitor when a user activates a hand sanitizer or soap dispenser.

A silent vibration reminds the user to sanitize when they have entered hygiene zones.

Timed alerts can improve hand wash rate compliance among workforce.

Water resistant touch screen sensor

Band comes in multiple colors

Easy removal for USB charging

Polyurethane ionized band self-disinfects

Visual and vibration alerts

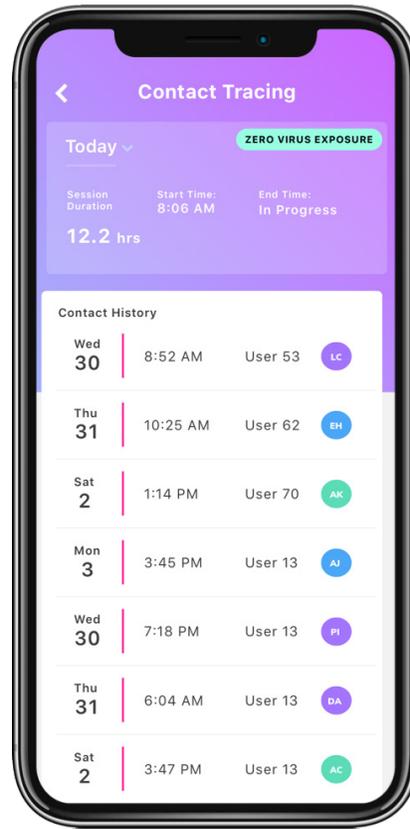

Dine with Peace of Mind

Vitalacy Automated Contact Tracing

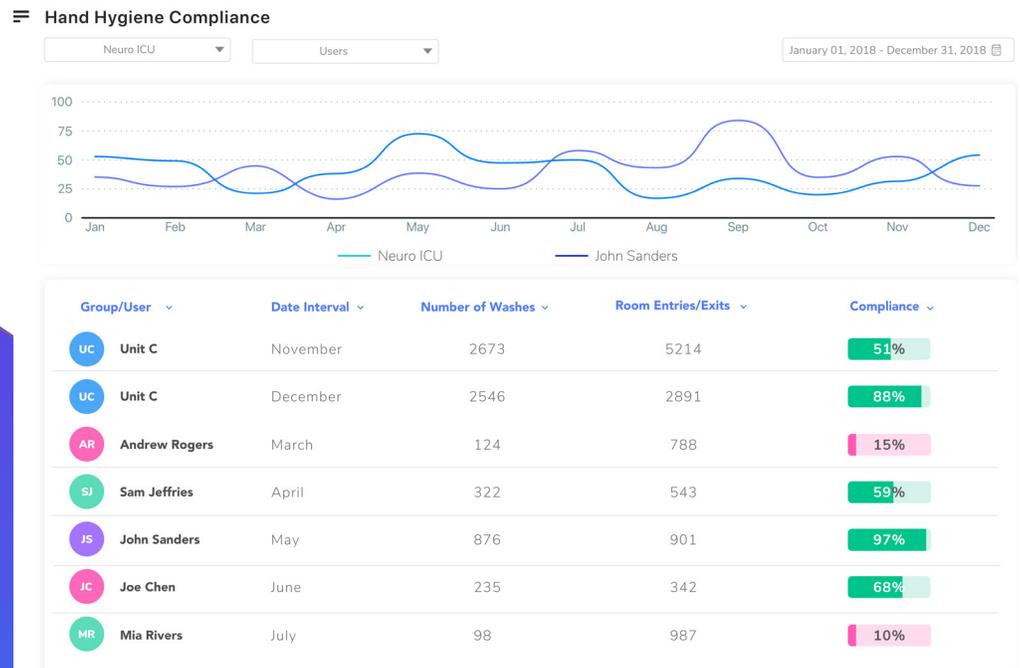

Reduce infection risk to staff and encourage safe distancing. Real-time vibration alerts notify users that another user may be too close.

Contact tracing enables management to practice selective workforce quarantine measures.

Dashboard Reporting

Workforce hand hygiene and proximity data is sent via wifi to a remote cloud for easy dashboard access from any device. Data stored and displayed from an individual level up to total enterprise.

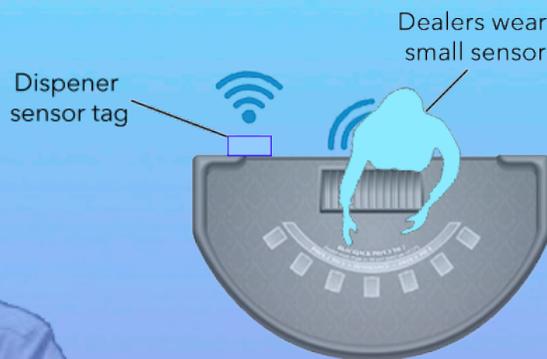

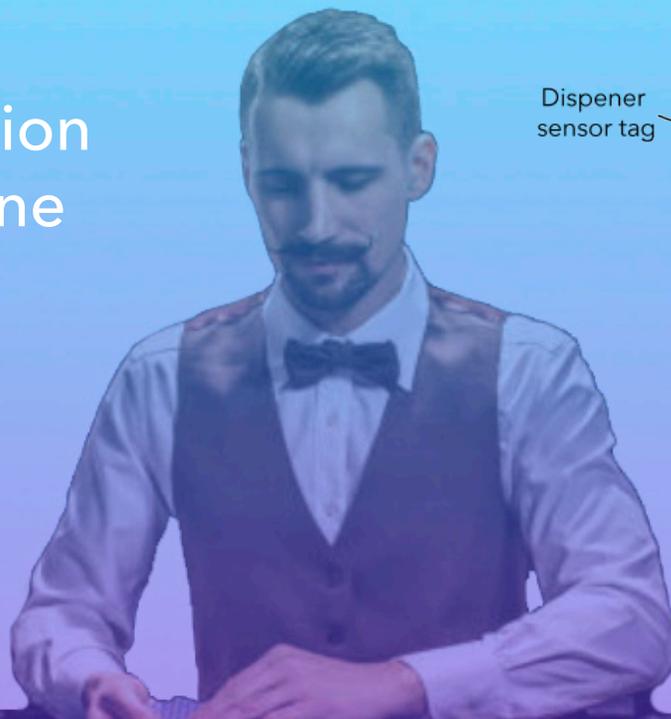

Explore infection plan pathways with Vitalacy

- Reduce exposure risk -
- Meet new operational requirements -
- Protect the workplace and public -

“Mitigate and reduce the risk of exposure to COVID-19 for all employees, patrons and other guests.” - *NGC Health and Safety Policy*

Silent Vibration Hand Hygiene Reminders

Keep your workforce safe.
Ensure hygiene confidence.
